

# make IT AT home

## *Gemstone Magnets*

### **Provided in the kits:**

- Scrapbook paper
- Glass gems
- Mod Podge
- Sponge
- Magnets

### **You will also need:**

- Glue
- Scissors

1. Select patterned paper of your choice.
2. Place a glass gem on the paper and trace with a pen.
3. Cut out the circle. Trim off a little extra so that the paper doesn't hang over the edge of the glass gem.
4. Using a sponge or paintbrush, add a thin layer of Mod Podge to the patterned side of the paper.
5. Place the patterned side of the paper against the flat side of the glass gem.
6. Smooth to remove bubbles, and press firmly in place.
7. Using a sponge or paintbrush, add another thin layer of Mod Podge to the back of the paper. You will need to apply the Mod Podge slightly over the edge of the paper to seal it completely to the glass gem.
8. Allow Mod Podge to dry.
9. Use glue to attach your magnet to the glass gem.
10. Allow the finished product to dry completely before hanging.

View the instructional video on our YouTube channel and Facebook page beginning Monday, April 12.
