

make IT AT home

Geometric Coasters

Provided in the kits:

- 2 cork coasters
- Acrylic paint
- Paint brush
- Thin painter's tape

You will also need:

- Scissors
- Cup of water
- Paper to cover your workspace

1. Lay the coasters flat on the table.
2. Apply the painter's tape in a geometric pattern of your choice.
 - Ensure that the tape is firmly in place to prevent the paint from bleeding.
 - If you plan to paint the edges of the coaster, make sure to extend the tape over any portion of the edge that you do not want to paint.
3. Using colors of your choice, carefully paint within each shape.
4. Carefully remove the painter's tape.
5. Allow to dry completely before use.
