

# make IT AT home

## Tissue Paper Watercolor

### Provided in the kits:

Bleeding tissue paper  
Canvas board  
2 printable quotes  
Black permanent marker  
Sponge

### You will also need:

Pencil  
Water  
A covered workspace – to avoid stains

1. Select a printable quote for your project.
2. On the backside of the printable, completely color over the design with a pencil.
3. Flip the paper over and position the quote on your canvas.
4. Take a sharp pencil and trace over the outline of the letters.
5. Remove the paper from the canvas to reveal the transferred quote.
6. Use a permanent marker to fill in the lettering on your canvas.
7. Allow the permanent marker to dry.
8. Lightly wet your canvas with a sponge and water.
9. Lay the tissue squares onto the wet canvas in a design of your choice - you may need to again wet the area until the tissue is completely saturated.
10. For a vibrant color, allow the tissue squares to dry for a minimum of 5 minutes. For a pastel color, remove the tissue squares sooner.
11. Repeat the tissue process again if you desire a more “layered” look.
