

# make IT AT home

## Teacup Fairy Garden

### Provided in the kits:

- Teacup or mug
- Succulent
  - *Please note: teacup colors and plants will vary*
- Succulent potting mix
- Miniature mushrooms
- Miniature frog
- Glass stones
- Artificial moss

### You will also need:

- Paper to cover your workspace
- Gardening gloves if desired

### Instructions:

1. Fill the cup half full with soil.
2. Place the succulent in the cup and continue to fill the soil around the plant.
3. Use the provided accent items to decorate your teacup as desired.

### Succulent care courtesy of HGTV.com:

- Plants should only be watered when the soil or planting medium is completely dry.
- Succulents will do best in a special potting mix blend made for succulents and cacti.
- Don't fall into the trap of thinking that succulents exclusively like hot weather and full sun. Too much hot sun can burn those fleshy leaves and drain them of their unique, beautiful color patterns. When growing succulents outdoors, they do best with cooler morning sun and afternoon shade. When growing them indoors, they prefer the bright light of a south-facing window.

View the instructional video on our YouTube channel and Facebook page beginning Monday, June 6.
